Work Policy

It is our working policy, that we as far as possible delegate the different tasks, however we still will work together as much as possible, to ensure the best result. Apart from that, a part of our working policy is to have a 15 minute scrum-meeting once every tuesday.

Regarding conflicts, our policy is that it if possible, is first tried to be resolved by the parties involved. If the conflict cannot be resolved by the parties involved, a neutral third party is involved.

In case of larger disagreements, it is our policy that an extraordinary meeting is held. Here the different group members will each get a chance to argue for the solution they think is best.

Mads has been assigned as a neutral third party assistant to provide additional cooperation.

Work Frequency

We have decided to expect an activity of three work days a week and if necessary there will be meetings on the weekends as well. This all depends on the amount of workload.

Work Place

Our meetings will primarily take place at the IT-University of Copenhagen, however we are also open to gathering in alternative places such as, cafées or at each others homes, depending on the convenience and opportunity. In addition to meeting in person, we will be utilizing online platforms to communicate like Messenger and Discord. By combining both physical and digital places, we aim to make a flexible and efficient work environment

Group Ambition & Effort

As a group, we have established high ambitions for ourselves. This will also include effort from each individual to ensure a cooperative and thriving group project. We have decided to focus on a work plan in which we delegate the work across every member which we are looking forward to, as it ensures everyone contributes equally and plays to their strengths while maintaining accountability.
Our ambitions are to complete the requirements and also look into the extensions, if we have the time. Our primary goal is to not only fulfill the above, but also to encourage each other to motivate each other to not only meet the requirements, but focus on good teamwork and ensure for each of us that we are providing the best of our capabilities.

Work Plan

At our first meeting we are planning to have an establishment-meeting to set a common goal and set our expectation of the project which will be followed up on with a planning meeting.

We are planning for the first two weeks to get a broader understanding of the project and start indicating which work areas suit each individual best.

TA

We wish to use our teacher assistant, Mads, for some code reviewing, which will be kept minimal. Besides that, we will make sure to ask Mads questions about the project, if we are ever in doubt, so we can continue as quickly as possible and therefore not waste precious time.

We are going to have meetings with Mads on Thursdays between (8 - 16), the exact time will depend on the availability of the group as well as Mads. The first couple of weeks, these meetings will be weekly; later on they will be held every other week. If necessary, we will have the possibility to have meetings on Tuesdays.

We as a group will make sure to have an agenda and preferably send it to Mads a couple of days before. We will give Mads the required time to code review, if necessary, as well as know what specific questions we have for him. The agenda will provide an overall idea of what the meeting is about, what problems we are encountering and so on. This ensures the meeting is not wasted and we can have an effective dialogue.
